

To create auction items end-to-end in the CMS, follow these steps. The process involves creating categories first, then auctions, and finally auction items within those auctions. Access the CMS panel at [/cms/panel](#).

Step 1: Create a Category

- Navigate to **Categories Management**.
- Click **"Add New Category"**.
- Enter a **Category Name** (required).
- Optionally upload a **Category Image** (PNG/JPG/JPEG/WebP, max 5MB).
- Click **"Create Category"**.

Step 2: Create an Auction Lot

- Navigate to **Auction Lots Management**.
- Click **"Add New Auction Lot"**.
- Fill in the required fields:
 - **Auction Lot Name** (required).
 - **Auction Lot Description** (required).
 - **Location** (required).
 - **Auction Lot Category** (select from existing categories, required).
- Optionally add:
 - **Auction Lot Image** (PNG/JPG/JPEG/WebP, max 5MB).
 - **Auction Lot Tags** (add multiple tags).
- Click **"Create Auction Lot"**.

Step 3: Create Auction Items

- Navigate to **Auction Items Management**.
- Click **"Add New Auction Item"**.
- Fill in the required fields:
 - **Auction Item Name** (required).
 - **Auction Item Description** (required).
 - **Choose Auction Lot** (select from existing auctions, required).
 - **Auction Item Start Date** (datetime, required).
 - **Auction Item End Date** (datetime, required).
 - **Base Bid Price** (numeric, required).
 - **Buyer's Premium** (fixed amount, required, default 0).
 - **Tax Percentage** (0-100, required, default 0).
- Optionally add:
 - **Status** (Live/Upcoming/Closed, default Live).
 - **Terms** (text).
 - **Choose Auction Item Images** (multiple images, PNG/JPG/JPEG/WebP).
- Click **"Create Auction Item"**.

Once created, auction items will appear in the list. You can edit or delete them as needed. Items must belong to an auction lot, and auctions must belong to a category. This ensures proper organization. If confused, categories group auctions, auctions contain items.
